The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/519,366	Applicant(s) HUW ET AL.	
	Examiner Wayne Langel	Art Unit 1793	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1793

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 and 10-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Australian 683611 in view of the Abstract of the article entitled "Mineralogical and geochemical investigations of bentonite deposits in the northern Kelkit Valley, Turkey"(newly cited). Australian 683611 discloses a composition including basalt, dolomite, limestone and a "similarly naturally occurring mineral. (See claim 3.) The difference between the composition disclosed by Australian 683611, and that recited in applicants' claims, is that Australian 683611 does not specifically disclose that the composition should include claystone. The Abstract of the aforementioned article suggests that basalt is related and similar to limestone and dolomite. It would be obvious from the article to employ basalt as the "similarly naturally occurring mineral" in the composition of Australian 683611. There is no evidence on record of unexpected results which would emanate from the use of basalt, as opposed to other naturally occurring minerals, as an included mineral in the composition of Australian 683611.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1793

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 24 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no "description support" in the original specification for providing a final product containing the recited ingredients in a ratio of "approximately 8:3:1:1"

Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The recitation of "at least one of...and" is improper Markush terminology.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne Langel whose telephone number is 571-272-1353. The examiner can normally be reached on Monday through Friday, 8 am - 3:30 pm Eastern Time.
